Sort by : ...

A square with its two diagonals drawn, forming an 'X' shape. The diagonals intersect at the center of the square.

The graph shows a price that starts at £34, increases to £40, and then decreases back to £34.

A right-angled triangle is shown, representing the area of the rectangle. The horizontal base of the triangle is labeled "£34". The vertical height is not explicitly labeled but corresponds to the width of the rectangle in the previous slide.
